DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamada et al. (WO 01/39554 A1, applicant submitted prior art).

With respect to claim 1, Yamada discloses a light emitting device having a resonator structure (abs.) which resonates lights generated in a light emitting layer (fig.4 13c) between a first end (bottom near #12) and a second end (top near #15), and extracting lights at least from the second end side, wherein: reflectance of outside lights in resonant wavelengths which is incident from the second end side is 20% or less (fig.20).

With respect to claim 2, Yamada discloses respective strengths and phases of reflected lights are adjusted so that the reflectance of the outside light becomes 20% or less (abs., fig.20).

With respect to claim 3, Yamada discloses the organic layer is light emitting (fig.4 13c).

With respect to claims 4 and 5, Yamada discloses a semi-transparent reflection layer (fig.4 #14) is provided on the second end, and has an extinction coefficient of 0.5 or more and a refractive index of 1 or less (since is made of Mg/Ag alloy).

With respect to claim 6, Yamada discloses the claimed mathematical formula relating the phase shift, optical distance, and light spectrum (abs.).

With respect to claim 7, Yamada discloses color filters that transmit the light extracted from the second end side are provided (fig.19/21). Claims 8-14 are rejected for the same reasons as outlined in the rejections to claims 1-7 above, as the remaining claims only differ in preamble recitation which is not found to be limiting.
